

FOR IMMEDIATE RELEASE

Systems With Intelligence Wins 2022 Top Utilities Asset Management Solutions Provider Award from Utilities Tech Outlook

Mississauga, ON – For the first time, Systems With Intelligence has been honoured with the 2022 award as the Top Asset Management Solutions Provider.

The uniqueness of Systems With Intelligence can be perfectly demonstrated by its one-of-a-kind offering—a control room mechanism where a dedicated team understands and analyzes the nitty-gritty of applications that helps with analysis of any anomalies that could lead to system failures. This saves time, money and empowers the utility particularly with remote site management

“We’re proud of this award and thrilled to be recognized for our contribution to the industry” said Angelo Rizzo, President and CEO. “As budgets are squeezed and resources are stretched thinner and thinner, creating a reliable system to empower the utility to gain further visibility and understanding into the safety, security and maintenance of their remote sites solves a problem they are all grappling with.”

Systems With Intelligence’s turnkey Touchless™ technology comes with mobile monitoring capability to help customers gain visibility into unmonitored locations and detect trouble spots in their facility.

Quick Facts

- Systems With Intelligence is a Canadian company, founded in 2009
- Systems With Intelligence Touchless™ monitoring systems are installed in over 100 utilities worldwide
- Systems With Intelligence senior management team has over 100 years of collective experience in utility asset monitoring and communications technologies

About Systems With Intelligence

Systems With Intelligence Inc. is a global provider of Touchless™ monitoring solutions for electric utility applications. SWI systems collect and analyze the data that allows utilities to increase safety and reliability while reducing operating costs. Coupling thermal monitoring and visual imaging technology with advanced analytic algorithms, Systems With Intelligence solutions automate remote site monitoring. Systems With Intelligence products are engineered to operate in the harshest environments, withstand high levels of electromagnetic interference, static discharge and voltage surges found in industrial applications to ensure uninterrupted operation. Providing a monitoring system that operates reliably and connects seamlessly allows customers to remain focussed on their operations.

The Systems With Intelligence management and technical teams are comprised of professionals with extensive experience in advanced technology for mission critical applications in harsh environments. With domain expertise in substation and industrial automation, communications and utility operations our team is uniquely positioned to deliver effective and intelligent monitoring solutions.
