

FOR IMMEDIATE RELEASE

Systems With Intelligence Launches ENVISION™ Grid Investment Planning Software

*Intelligence for optimal performance and better decision-making
across the power grid*

Mississauga, ON – Systems With Intelligence launched ENVISION™ today at DISTRIBUTECH.

Specifically built for electric power utilities and powered by Engineered Intelligence, the software provides the intelligence needed to maintain the optimal performance of transmission and distribution infrastructure, allowing utilities to plan and prioritize their maintenance activities.

“Typical asset management systems don’t cover the depth of scenarios possible, nor do they deliver the data quickly enough,” said Angelo Rizzo - President & CEO. “ENVISION™ is the platform utilities have been waiting for to get consistent, measurable and repeatable results from their data.”

Beyond daily intelligence, ENVISION™ automates the process of investment scenarios and forecasting. These forecasts provide accurate ready-to-use analytics, with objective risk analysis that leverages real science and expert-informed reporting.

ENVISION™

- Data driven platform
- Consistent, measurable results
- Evaluates interconnected systems from the ground up
- Quick feedback on forecasts for faster, better decision-making

ENVISION™ is a modular system architected to support different AM use cases. Product overview documentation is available [here](#) (requires registration).

Quick Facts

- Systems With Intelligence is a Canadian company, founded in 2009
- Systems With Intelligence Touchless™ monitoring systems are installed in over 100 utilities worldwide
- Systems With Intelligence senior management team has over 100 years of collective experience in utility asset monitoring and communications technologies

About Systems With Intelligence

Systems With Intelligence Inc. is a global provider of Touchless™ monitoring solutions for electric utility applications. SWI systems collect and analyze the data that allows utilities to increase safety and reliability while reducing operating costs. Coupling thermal monitoring and visual imaging technology with advanced analytic algorithms, Systems With Intelligence solutions automate remote site monitoring.

Systems With Intelligence products are engineered to operate in the harshest environments, withstand high levels of electromagnetic interference, static discharge and voltage surges found in industrial applications to ensure uninterrupted operation. Providing a monitoring system that operates reliably and connects seamlessly allows customers to remain focussed on their operations.

The Systems With Intelligence management and technical teams are comprised of professionals with extensive experience in advanced technology for mission critical applications in harsh environments. With domain expertise in substation and industrial automation, communications and utility operations our team is uniquely positioned to deliver effective and intelligent monitoring solutions.
