

### ***Systems With Intelligence and GE Vernova Sign MoU***

Systems With Intelligence (SWI) and GE Vernova have signed a memorandum of understanding (MoU) at CIGRE 2024 in Paris, agreeing to join forces and collaborate on the development of enhanced grid asset management solutions.

This partnership will focus on combining innovative technologies such as gas sensing, bushing monitoring, and infrared thermography with artificial intelligence (AI) and machine learning (ML). By integrating SWI's state-of-the-art infrared Touchless™ monitoring systems with the Grid Automation expertise of GE Vernova, the companies aim to boost reliability and streamline monitoring for utilities and TSOs.
